

FILLING, CLEANING AND MAINTENANCE OF STAINLESS STEEL SOAP DISPENSERS

1. Filling the Dispenser

- › This dispenser is only designed for PH neutral liquid soaps.
- › We do not recommend using high viscosity liquid soaps or gels, which may impair function.
- › Liquid soap with high sodium chloride content can cause corrosion and may invalidate the product warranty.
- › When filling with liquid soap, be sure to wipe off liquid spilled on the dispenser.
- › We recommend using Dolphin solutions ltd 'Pearlised' liquid soap (Product code: LIQUIDSOAP).

2. Maintaining the Dispenser

- › If dispenser fails to function, empty the liquid soap from the soap tank and re-fill with warm water. Pump the warm water through the dispenser to dislodge any dried soap residue and then re-fill the container with fresh liquid soap
- › ONLY clean inside the dispenser with warm water; NEVER use solvents or aggressive household cleaners like bleach, acids (e.g.descalers) or ammonia-based bathroom cleaner.
- › To clean the outside of the dispenser, use warm soapy water or approved stainless steel cleaner. Clean along the grain. Never use an abrasive cloth to remove stubborn stains. Dry with a soft clean cloth.
- › Dolphin Solutions Ltd recommends "Steel Clean" cleaning agent obtainable from: Vitopan Tel: 01204 863000
- › Should brown deposits appear around the lid or pump, remove with a cleaning cloth and soapy water.
Hard deposits can be scratched off. This deposit is not rust (stainless steel does not rust) and to avoid it, try changing to a milder liquid soap with a neutral PH
- › Abrasive cleaners, chloride cleaning agents and carbon steel brushes/steel wool will scratch the stainless steel and must not be used.

Warranty

This product is covered by a 12-month warranty from the date of purchase to be free from defects if installed and maintained in accordance with these instructions. Dolphin Solutions will replace or repair (as appropriate) free of charge any product with a proven manufacturing defect if reported within the warranty period.

Please feel free to contact the Dolphin Technical Helpline should you experience any difficulties: 01424 202224.
