TECHNICAL DATA

Capacity
1 litre

Power Supply
IP 67 Battery Box for 6xD Alkaline batteries / Transformer

Soap viscosity
100 – 3800 cPs

Standard discharge:
0.8cc, Adjustable

Sensor Range:
30-100 +/- 10mm, Adjustable with remote control
PRE INSTALLATION INFORMATION

CHECK CONTENTS
› Separate all parts from the packaging and check each part with the “Pack contents” section.

› Make sure all parts are accounted for before discarding any packaging material. If any parts are missing, do not attempt to install your touch free soap dispenser until you obtain the missing parts.

WARNINGS
› Highly reflective surfaces directly beneath the sensor of this product, in particular polished finish basin wastes/strainers, will cause false activation of the infrared sensors and can result in malfunction. We recommend satin or matt finish products which can be found on our website.

› It is very important to allow permanent access to the mounting tail/nut of this product for future servicing and repair. Where this is not possible see our wall plate mounted products.

› To avoid reflection problems keep a distance of more than 300 mm. between the sink and the spout.

› This tap model, with an infrared sensor pointing down, is not intended to be used together with a sink of a reflective material such as stainless steel.

› If a sink strainer is straight below the tap sensor, use a strainer with a non reflective finish (do not use a chrome plated one).

Important: Keep in mind that the location of the user hands, while using the tap nearby should not interfere with the soap dispenser sensor detection area.

Correct Installation

Incorrect installation
Familiarise yourself with the part names and confirm that the parts are included.

**PACK CONTENTS BC632/ BC635**

1x Body assembly for Soap Dispenser (incl. electronic unit)

1 x M 4 x 4 Set Screw

1 x Bottle Support

2 x Screw 3.5x1 1/4”

2 x 5 mm Anchors

Battery box

Transformer
INSTALLATION WALL PLATE VERSION

enquire for details

1 x Body assembly for Soap Dispenser (incl. electronic unit)
1 x Temporary Base Cover
1 x M 4 x 4 Set Screw
1 x Elbow and Corrugated Tube
1 x bottle support
1 x Soap tank and pump assembly
2 x Screw 3.5x1 1/4"
2 x 5 mm Anchors
Battery box
Transformer
STEP 1 – PREPARING FOR INSTALLATION
1. Drill a hole (23 to 24 mm) at the desired location for the soap dispenser spout installation.
2. Drill a small hole (3.2 mm) just above the previous one for the anti-rotation pin, according to the diagram.
3. Remove the hexagonal nut and the disk from the base of the soap dispenser spout.

STEP 2 – INSTALLING THE SOAP DISPENSER
1. Insert the Soap dispenser base.
2. Insert the anti-rotation pin into the small hole.
3. Fix the base behind the wall with the hexagonal nut and the disk.
4. Fix the bottle support to the desired location.
5. Assemble the tube from the pump to the soap dispenser.
**STEP 3 – CONNECTING THE POWER SOURCE**

1. Remove the protective sticker covering the sensor. Keep away from the sensor range and check that no objects are in front of the sensor.

2. a. Connect the motor connector to the power source connector. Please note that since the connector is waterproof, some friction might apply. **Important:** the 4 contacts connector should be connected properly so that the white o-ring is not visible and a clicking sound is heard. **Pay attention:** If the 4 contacts connectors will not be connected properly, the motor will work continuously.

   ![Connector Images]

   O-ring visible – not connected properly  
   Connected properly so that only the grooves are visible

   ![Connector Diagrams]

   a. For battery versions: install the battery box at the wall underneath the sink and connect the battery connector
   b. For transformer versions: plug the transformer into the electricity socket and connect the transformer connector

3. Wait about 10 seconds before you put your hands within the sensor range.
**STEP 1 – PREPARING FOR INSTALLATION**

1. Disconnect the soap dispenser body with the rosette by unscrewing the set screw.
2. Cut an adequate opening in the wall for the dimensions of the soap dispenser base (where you want to install the spout), and the corrugated tube.

**STEP 2 – INSTALLING THE SOAP DISPENSER**

1. Mount the soap dispenser base to the opening cut in the wall, and set it using the two small anchors provided.

**Important:** The soap dispenser base should be installed so that the outside surface of the finished wall falls between the minimum and maximum lines marked at the base.

2. Assemble the temporary protective soap dispenser base cover.
3. Assemble the corrugated tube to the soap dispenser base and make sure it will stay outside of the wall when tiling.

4. Once the works on electricity, plumbing and tiles have been finished, insert the wall rosette through the soap dispenser base.

5. Cut the temporary soap dispenser base cover.

6. Fix the soap dispenser spout by inserting the nipple into the soap dispenser base and tighten the screw.

7. Pull the four way connector and the power supply connector out of the soap dispenser base, and lead it through the corrugated tube.
STEP 3 - CONNECTING THE POWER SOURCE

1. Remove the protective sticker covering the sensor.
   Keep away from the sensor range and check that no objects are in front of the sensor.

2. a. Connect the motor connector to the power source connector. Please note that since the connector is water proof, some friction might apply.
   **Important:** the 4 contacts connector should be connected properly so that the white o-ring is not visible and a clicking sound is heard.
   **Pay attention:** If the 4 contacts connectors will not be connected properly, the motor will work continuously.

   ![O-ring visible – not connected properly](image1)
   ![Connected properly so that only the groves are visible](image2)

   b. For battery versions: install the battery box at the wall underneath the sink and connect the battery connector
   c. For transformer versions: plug the transformer into the electricity socket and connect the transformer connector

3. Wait about 10 seconds before you put your hands within the sensor range.
FILLING THE SOAP TANK

1. Unscrew the soap tank from the pump assembly.

2. Fill in the liquid soap up to the top line.

3. Insert the bottle with the tube inside the bottle support.

4. Screw the soap tank back to the pump assembly. Make sure the tank is secured firmly in place.

5. Press the refill button located at the back of the pump assembly until soap starts coming out of the soap dispenser spout. This operation can also be done using the soap dispenser remote control Refill function.

Note: Once the soap in the soap tank has reached the bottom line the soap tank should be refilled. To refill the soap tank please refer to steps 1-5.
If desired, use the remote control to adjust the soap dispenser settings. Hold the remote control straight in front of the sensor in a distance of about 10-15cm.

**Attention:** Holding the soap dispenser remote control out of the recommended range (too close or too far) may interfere with the remote’s activation.

Choose the function you want to adjust by pressing on the function button as follows:

**1 SOAP QUANTITY**

The 1-4 drop keys allow the user to choose the desired soap quantity.

- **1:** 0.2 to 0.4
- **2:** 0.7 to 0.9
- **3:** 1.2 to 1.6
- **4:** 2.1 to 2.3

**Indication:** continues blink of the red light in the sensor eye.

* The exact soap dosage depends on the soap viscosity.

**2 ADJ**

This function allows coming back to soap quantity factory settings. Press the ADJ button. Indication: 2 blinks of the red light in the sensor eye.

**3 TEMPORARY OFF FUNCTION**

This function is ideal to perform any kind of activity in front of the sensor without operating the system (for example, cleaning). The soap dispenser will remain shut for 1 minute when this button is pressed once. To cancel this function and to return to normal operation press the On/Off button again or wait 1 minute.

**Indication:** OFF – 2 fast blinks, ON – 4 fast blinks

**4 REFILL THE SOAP TANK**

Once the soap tank has been refilled, press the FILL button. The pump would work for one minute in order for the soap to start coming out of the soap dispenser spout. To stop this activity press the FILL button again.
BATTERY MODELS ONLY

When the battery weakens, the red indicator light will blink at a constant rate when the user’s hands are within the sensor range. The battery must be replaced within two weeks.

To replace the battery in battery models:
1. Carefully open the battery box
2. Remove the old batteries
3. Replace the used batteries with new D batteries

NOTE: Do not mix used batteries with new ones.

4. Close the box.

Important: Spent batteries should not be disposed of with normal household waste. Contact your local authority for information on waste disposal and recycling.
CARE AND CLEANING OF CHROME AND SPECIAL FINISHES

DO NOT use steel wool or cleansing agents containing alcohol, acid, abrasives, or the like. Use of any prohibited cleaning or maintenance products or substances could damage the surface of the soap dispenser. For surface cleaning use ONLY soap and water; then wipe dry with a clean cloth or towel. When cleaning bathroom tiles, the soap dispenser should be protected from any splattering of harsh cleansers.

DOLPHIN SOLUTIONS LTD warrants that its electronic products will be free of defects in material and workmanship during normal use for two years from the date the product is purchased. If a defect is found in normal use, Dolphin Solutions will, at its discretion, repair, provide a replacement part or product, or make appropriate adjustments. Damage caused by accident, misuse, or abuse is not covered by this warranty. Improper care and cleaning will void the warranty. Proof of purchase (original sales receipt) must be provided to Dolphin with all warranty claims.

Dolphin Solutions is not responsible for labor charges, installation, or other incidental or consequential costs other than those noted above. In no event shall the liability of Dolphin exceed the purchase price of the product.

If you believe that you have a warranty claim, contact your Dolphin Solutions’ Distributor, Dealer or Plumbing Contractor. Please be sure to provide all pertinent information regarding your claim, including a complete description of the problem, the product, model number, the date the product was purchased, from whom the product was purchased and the installation date. Also include your original invoice.

DOLPHIN SOLUTIONS AND/OR SELLER DISCLAIM ANY LIABILITY FOR SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES. This warranty excludes product damage due to installation error, incorrect maintenance, wear and tear, battery, product abuse, or product misuse, whether performed by a contractor, service company, or the consumer. This warranty does not cover product damage caused by the following:

• Incorrect installation.
• Improper manipulation, tampering, bad or lapsed maintenance.
