

# Recommendations for Paper Towels

Fold Name	Description	Illustration	Pros and Cons
<p><b>C-fold</b> arranged in tiers</p> <p>Recommended for <b>under-counter</b> paper towel dispensers</p>	<p>First paper towels are folded centrally. Then both sides are folded inwards (to a „C“). The paper towels are lying on each other separately.</p>		<ul style="list-style-type: none"> <li>+ large paper size</li> <li>- paper towel must be unfolded manually after withdrawal.</li> </ul>
<p><b>V-fold</b> arranged in zigzag</p> <p>Recommended for <b>surface- and flush-mounted</b> paper towel dispensers</p>	<p>Paper towel is folded in the middle once (to a „V“). Towels are lying into each other.</p>		<ul style="list-style-type: none"> <li>+ Low acquisition costs</li> <li>- small paper size</li> </ul>
<p><b>Z-fold</b> arranged in zigzag “Interfold” “Non Stop”</p> <p>Recommended for <b>surface- and flush-mounted</b> paper towel dispensers</p>	<p>Paper towel is folded twice (to a “Z”). Towels are lying into each other.</p>		<ul style="list-style-type: none"> <li>+ Larger paper size comparing to V-fold</li> <li>- High consumption due to “Non Stop”</li> </ul>
<p><b>W-fold</b> arranged in zigzag “Interfold” “One stop”</p> <p>Recommended for <b>surface- and flush-mounted</b> paper towel dispensers</p>	<p>Paper towels are lying in two parallel rows each three times folded (to a “W”). Each paper towels is joined to the next with a perforated tear-off part (“One stop”). After tear-off of the first towel of row one the lowest towel of the second row is looking out of the bottom of the dispenser.</p>		<ul style="list-style-type: none"> <li>+ Large paper size</li> <li>+ Towel is completely unfolded after withdrawal</li> <li>+ Low consumption</li> <li>- some higher acquisition costs</li> <li>- nearly no standard paper sizes</li> </ul>
