## **OPERATION**

- › Remove manifold from bottle and fill bottle with liquid soap
- › Re-fit manifold and attach clear PVC tubing to the stems of the soap dispensers (See soap dispenser data sheet for fitting of tube to soap dispenser)
- › Purge soap dispensers by pressing plunger heads until the soap has drawn all the way through the dispenser and out through the spout

### **Liquid Soap**

- › We recommend using Frost 'Pearlised' liquid soap (Product code 06.8305). We do not recommend using high viscosity liquid soaps or gels, which may impair function. Warning: Liquid soap with high sodium content can cause corrosion and may invalidate the product warranty.

## **CARE AND MAINTENANCE**

- › If the soap dispenser fails to function correctly, firstly check all connections are tight and free from air leaks. If dispenser still fails to function, remove the manifold from the 5 litre bottle and place in a bottle of warm water. Purge the water through the tubing by pressing the plunger head of the soap dispenser until water is drawn out through the spout. This should dislodge any dried soap residue. Re-fit manifold to soap bottle and repeat purging operation.

## **WARRANTY**

This product is covered by a 12-month warranty from the date of purchase to be free from defects if installed and maintained in accordance with these instructions. Dolphin Solutions will replace or repair (as appropriate) free of charge any product with a proven manufacturing defect if reported within the warranty period.
