DOLPHIN FOAM CARTRIDGE DISPENSER – BEHIND MIRROR

- Behind mirror infrared foaming soap dispenser
- Touch Free
- Designed to be fitted behind hinged mirror or panel (access required to replenish soap supply)
- Hidden dispenser helps prevent vandalism
- 2 litre sealed cartridges – 6000 shots approx. (AL0742)
- Adjustable soap shot size & air settings via remote – purchased separately (DB53)
- Adjustable soap, air & range settings via advanced remote – purchased separately (DB52)
- Powered by 3 pin 12v transformer. Draws maximum current of 0.5A at sensor activation
- Suitable for Hand Sanitiser
- The peristaltic pump allows the use of different soap viscosities, including antibacterial gels
- Refill priming button
- Power connections: soap dispenser female connects to male power source
- Vent pipe level indicator provides visual alert to change the cartridge.
- Compliant with WELL v2 2018 by International WELL Building Institute. W08 Handwashing, Part 2A and Doc M
- Hand held shut-off connector used to connect new cartridge. Clicks in and out without exposing soap
- Flexible pipe outlet hangs slightly below bottom edge of mirror
- Stainless steel construction. Brushed satin and mirror polish finishes available; powder coating also available – contact us to enquire
- 2 year guarantee
- Also available with a 12V hardwire transformer

HEIGHT	**500 MM**
WIDTH	**140 MM**
PROJECTION	**108 MM**

DS810

WHY CARTRIDGE?

The Problem

› Traditional bulk fill systems are at high risk of becoming contaminated and congealing due to exposure with environmental bacteria during the topping up process.

› Congealing in soap can block filters, gauzes and pipework rendering dispensers inoperable and requiring replacement. Once contaminated it is extremely difficult to eliminate symptoms.

The Solution

› Sealed cartridges dramatically reduce the risk of bacterial contamination by removing the topping up process and the need to expose the soap.

› A higher level of hygiene and reduced risk of congealing means the dispenser will maintain a higher efficiency/ function for longer and require less maintenance. Connecting a new cartridge is quicker, cleaner and avoids spillages that can occur when decanting soap from one container to another

Pack Contains

› 1 x Behind Mirror Foam Cartridge Dispenser

› 1 x Complimentary starter 2 litre refill cartridge – 6,000 shots approx (bought in pack of 4 ongoing)

Compliance & Certification

› The DS810 used in conjunction with compatible foam soap dispensers meets the requirements outlined in WELL v2 2018 by IWBI (International WELL building Institute)

› Section Water, W08 Handwashing, Part 2A

› WELL is a building standard with an aim to improve global health by transforming the spaces where people spend their lives. Research and evidence based.
